FLEXIBILITY

THE FIRST STEP TO CONFIDENT RESULTS

It is a common misconception that all laboratory microwave systems are alike; at Milestone we know this is not true. Sample preparation is one of the most impactful steps in trace metals determination. The quality of analytical data obtained by ICP/ICP-MS is directly reliant on digestion quality. Today, microwave technology in sample preparation has been established in a variety of industries: Environmental, Food, Pharmaceutical, Agriculture, Consumer Product Testing, Specialty Chemicals, Geological, Mining, and many others. Milestone's sample preparation solutions maximize the AA/ ICP/ ICP-MS/ performance, and a lab's overall analytical capability.

| FOCUS ON WHAT MATTERS: YOUR APPLICATION

Choosing the right system and configuration is a key step in maximizing investment and expanding your lab's capabilities. Some of the most crucial parameters that should be considered when choosing a microwave digestion system include the following:

SAMPLE TYPE

LAB THROUGHPUT

SIMPLICITY AND EASE OF USE

RELIABILITY

FLEXIBILITY

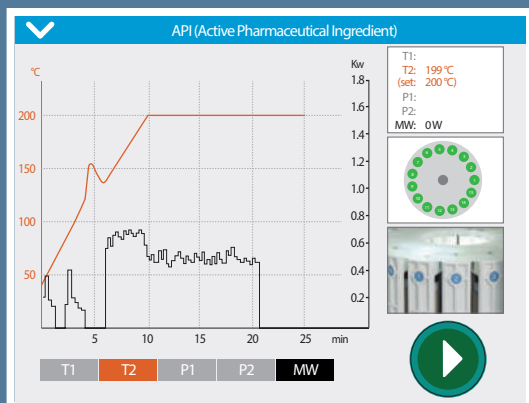

I SAFETY AND RELIABILITY IN SAMPLE PREPARATION

The ETHOS UP fully embodies Milestone's philosophy towards, and knowledge of, microwave sample preparation. Specifically designed for closed vessel acid digestion, it offers a perfect integration of microwave hardware, user interface, reaction sensor technology and pressure resistant vessels. The ETHOS UP is the most powerful system in the market, with two magnetrons and a total power of 1900 Watts. Microwave homogeneity is assured through a dedicated microwave diffuser. Safety and reliability are Milestone's priorities. Both factors are ever present in the foundation of the ETHOS UP's design. The cavity has a volume in excess of 70L, and is constructed entirely of stainless steel to ensure longevity and structural integrity. Our unique pressure responsive door, also made of stainless steel, ensures superior safety even with the most reactive samples. The safeVIEW high definition digital camera, allows to safely look into the microwave cavity.

EASE OF USE WITH UNPARALLELED DIGESTION CONTROL

In a digestion process the temperature controls the sample decomposition and directly affects digestion quality. Milestone pioneered the use of infrared sensors combined with an in-situ temperature sensor to more accurately control the digestion cycle. Today, Milestone innovates again by combining all the benefits of in-situ and infrared sensors into a single solution: **the Milestone easyTEMP, a direct contactless temperature sensor.**

The easyTEMP contactless sensor directly controls the temperature of all samples and solutions, providing accurate temperature feedback to ensure complete digestion in all vessels with superior safety. This technology combines the fast and accurate reading of an in-situ temperature sensor with the flexibility of an infrared sensor. The ETHOS UP software provides digestion history traceability and temperature measurement for every sample. Temperature diagrams and profiles are displayed in real-time, and can be saved on the ETHOS UP terminal.

FLEXIBILITY AND PERFORMANCE THAT MAKE THE DIFFERENCE

Rotors and pressure vessels are crucial components to ensure high digestion quality and safety. Milestone's rotors are built with high-purity PTFE-TFM, PEEK safety shields and a unique safety release mechanism.

I SK-15 ROTOR

Regardless of the samples you're trying to digest, the SK-15 High-pressure rotor is always an effective option to simplify your journey from sample to analysis, even with hard-to-digest samples, reactive samples or large sample masses. The SK-15 is a high-pressure and high-temperature rotor with a capacity of up to 15 PTFE-TFM vessels of 100 mL.

UNMATCHABLE VERSATILITY

LARGE SAMPLE MASS

HIGH PERFORMANCE

I MAXI-44 ROTOR

Many laboratories routinely process high number of samples, such as soils, sediments and aqueous samples. The MAXI-44, featuring up to 44 PTFE-TFM vessels of 100 ml, perfectly matches these requirements, providing high productivity, reliability and superior ease of use. The MAXI-44 finds its natural fit in all laboratories requiring to process large samples batches.

DIGEST LARGE BATCHES

EASY HANDLING

HIGH PRODUCTIVITY

I VENT-AND-RESEAL TECHNOLOGY

The vent-and-reseal technology ensure high quality digestion and full safety. The safety spring built into the cover allows for precise venting of the vessel, if that should occur. Once the pressure has been reduced to a containable level, the cover closes again. Only the excess pressure, mainly generated by CO₂, NO_x fumes, is therefore released, allowing for a complete recovery of even volatile elements.

SUPERIOR POWER AND PERFORMANCE FOR HIGH-VOLUME LABORATORIES

I MAXI-24 HP ROTOR

The MAXI-24 High Performance (HP) and high throughput rotor was designed with double pressure limits and greater capacity than other high throughput rotors. It process increased volumes of sample and a wide variety of matrices within a single rotor-based platform. The MAXI-24 HP, along with the built-in easyTEMP, contactless temperature control in all vessels, automatically controls the temperature even in case of exothermic reactions. Quick-assembly vessels are closed with a simple hand-tightening, improving your daily productivity.

SMART SOFTWARE TO SAVE YOUR TIME

The ETHOS UP comes with a dedicated touch screen terminal with easyCONTROL software which incorporates our expertise and knowledge in microwave sample preparation. The ETHOS UP user-interface provides full control of all digestion parameters, complete documentation and improves the overall procedure. The terminal is equipped with multiple USB and Ethernet ports for interfacing the instrument to external devices and to the laboratory network. The ETHOS UP controller is user-friendly, icon-driven, multi-language and 21 CFR Part 11 compliant. To find the method which best suits your application, simply select one of the hundreds of preloaded methods or create a

new one yourself using our intuitive software. Once you press 'START' the system will automatically follow the user defined temperature profile using a sophisticated PID algorithm. The preloaded applications, including all US EPA methods, virtually eliminate any need for method development. Each preloaded method includes a temperature profile, sample size and choice of reagents. To further simplify the workflow in the lab the ETHOS UP is equipped with a backlit logo that indicates the digestion progress, showing to the operator the actual status of the process, such as heating, cooling, sample ready and error messages.

milestone connect

Included with the ETHOS UP is a unique web-based application: Milestone Connect. This app allows you to become a part of the Milestone community and gain exclusive access to a robust library of information: lists of parts, technical notes, user manuals, video tutorials, continuously updated application notes and all relevant scientific articles. Milestone Connect also extends instrument control to your smartphone, tablet or PC, allowing remote monitoring of the system. With Milestone Connect you have instant support 24/7.

MILESTONE ETHOS UP MUCH MORE THAN A DIGESTION SYSTEM

The ETHOS UP embraces Milestone's philosophy of a "microwave labstation". The ETHOS UP platform is capable of several applications beyond microwave digestion. Extraction of pollutants from environmental samples can be done in just few minutes, consuming less solvent than other technologies, thereby improving productivity while decreasing costs, all in full accordance with the US EPA 3546. accessories are available to further expand the ETHOS UP capabilities: additional digestion rotors, inserts and micro-inserts to reduce blanks in the digestion processes, a dedicated configuration for total fat determination in food samples which greatly improves turn-around-time, and an ashing accessory which converts the digestion system into a microwave muffle.

MEETING REGULATIONS: MILESTONE'S VALIDATION PACKAGE

Compliance with regulations and data traceability requirements are paramount in the modern analytical lab, such as pharmaceutical, nutraceutical or other regulated industries. Milestone's operating software, easyCONTROL, is fully compliant with FDA regulation 21 CFR part 11. The Milestone Validation Package gives access to our factory trained engineers and specialists during the qualification process, enabling a fast implementation of the ETHOS UP in full accordance with Good Manufacturing Practice (GMP) guidelines. The comprehensive Milestone Validation Package (MVP) assures the complete qualification of the instrumentation. Different validation packages are available based on your specific needs: DQ (Design Qualification), IQ (Installation Qualification), OQ (Operational Qualification), PQ (Performance Qualification) and re-qualification.

MILESTONE HELPING CHEMISTS

Established in 1988, Milestone is headquartered in Italy and has offices in Germany, Switzerland, the United States, China, Japan and Korea. We operate worldwide through a network

of over 100 exclusive distributors, all providing our customers premium application and service support. Milestone's mission is to help chemists by offering them the most advanced instrumentation for sample preparation and direct mercury analysis in the world. Our industry-leading technology, in combination with fast, responsive service and applications support, allows Milestone to support our goal of providing you the highest return on investment possible.
